Industries

JDC Innovation

JDC Innovation is a company with a social purpose (integration into working life of people with disabilities or reduced school career) active in the fields of aerospace, defense, medical, automotive, ... In these sectors, the company realizes composite parts.

Research Bodies

-

In order to provide a more comprehensive service to its customers or additional outsourcing services, JDC will acquire the skills needed for Non Destructive Testing (NDT) for manufactured parts without undermining their integrity.

Total Budget

3,2 M€

JDC Innovation has introduced a project including both investment and training. The investment part consists of NDT equipment (ultrasonic) while training project includes all learning hours (2000 hours per operator) required for the control of this type of testing.
